

Consultant General Psychiatrist– £170,000 FTE

Do you want control over your schedule, seeing no more than 5 patients a day?

We are one of the UK's leading privately owned mental healthcare providers. CQC registered and a designated body, our ambition is to make the highest quality mental healthcare as accessible as possible.

Demand for our services is currently growing especially among those seeking a diagnosis for autism and ADHD. To help meet that demand, we are looking for Consultant Psychiatrists to join our team. These are general psychiatric roles, but with a requirement for experience in neurodevelopmental disorders especially ADHD & ASD.

Required qualifications and experience

- Consultant Adult Psychiatrist – with relevant experience in ASD (ADI-R trained) and ADHD (DIVA 5)
- Full GMC Registration (specialist register)
- Current MRCPsych status (or equivalent)
- Legal right to work in the UK
- Working knowledge of Mental Health Legislation, risk management principles and practical risk assessment

Move to a better way of working

You will be provided with full support from our report writing and triage team of qualified psychology assistants. You will have a well-balanced schedule seeing between 3 and 5 patients per day with extra time allocated for neurodevelopmental assessments. Your day-to-day will be supported by our bespoke mental health platform from which you can manage all your patient bookings, pre-assessment questionnaires and reporting.

Much of our work is currently conducted remotely. However, where face-to-face appointments are required, you will also have access to one of our many comfortable and spacious clinics nationwide.

In addition to the opportunities for personal development, we can offer:

- Competitive salary
- Contributory pension scheme
- 25 days annual leave plus bank holidays
- Your birthday as a holiday
- Sick pay
- Employee Assistance Programme

Next Steps

If this sounds like you, please drop us a line to set up an informal chat about how we can work together.
