

**Supporting NHS systems
to improve access and
outcomes in ND and
mental health care**

Clinical Partners is a leading mental health care provider and trusted NHS partner. We are privately-owned and have been supporting services across England since 2017. We are rated Good by the Care Quality Commission.

We focus on what matters most - improving access to care, reducing waiting times and delivering high-quality, clinically-led outcomes.

Combining multidisciplinary expertise, advanced technology and a commitment to continuous improvement, we help NHS systems respond to growing demand with sustainable, long-term solutions.

Over 150,000 NHS patients supported so far

A network of 400+ specialist clinicians across the UK

We work with NHS providers and commissioners to:

- Improve access to high-quality, safe and effective care
- Drive measurable improvements in clinical outcomes
- Enhance patient and family experience
- Improve efficiency through technology and innovation

Your partner in delivering high-quality, outcomes-led neurodevelopmental and mental health care.

Demand for mental health and neurodevelopmental services continues to outpace NHS capacity:

- Autism waiting lists have grown by ~70% since 2019
- 90% of patients wait longer than the 13-week NICE standard
- Over 450,000 referrals are made to mental health services each month

Clinical Partners has worked alongside NHS trusts and ICBs since 2017 to design and deliver end-to-end services that address these challenges and improve access, experience and outcomes.

We work in collaboration with NHS providers and commissioners to understand where we can add value to existing services. That means:

- Partnering to co-design solutions aligned to your needs and priorities
- Working in alignment with your systems and governance
- Building long-term, sustainable solutions, as well as meeting short-term demand

Our focus is on increasing capacity and improving how mental health systems work - for patients, clinicians and commissioners.

Our services include:

- Prevention and early support
- Access and triage services
- Assessment and formulation services
- Diagnosis and decision-making
- Treatment and ongoing care
- Family and patient support.

**Proud NHS
partner
since 2017**

We also develop innovative, clinically-led patient support solutions such as Autism Unlocked, an online library of content combining lived experience and clinical insight to support patients and families throughout their journey.

We recognise that meaningful improvement in neurodevelopmental and mental healthcare comes from partnership.

Please get in touch with our team to explore how we can work together to help you to deliver your priorities.
